

# Plummer Block Bearing

From the point of development to the finished product - Tröster is specialized in providing customized solutions for the drive technology on the European market.

Tröster Maschinenbau GmbH, having manufactured drive technology for many years, also manufactures pedestal bearing units including shafts in many sizes. The core competency of our company has been to realize customer specific solutions within short delivery times.

The shafts - from an individual piece up to a small series - are manufactured on professional machine tools in our factory.

Accessories, such as cooling discs to dissipate heat, can also be manufactured to size.

Where bought-in parts are concerned, we only trust the quality of well-known roller bearing manufacturers such as SKF, FAG, and SNR.

## Advantages at a glance:

- Easy maintenance
- Exchangeable solutions
- Extensive selection of sizes and executions
- High quality design and manufacture
- Short delivery times
